Introduction

The Bank recognizes, best corporate governance practices jointly with effective risk management techniques directs the Bank towards sustainable achievement in business goals while staying above the minimum regulatory requirements. Banks usually operate in a vulnerable environment and are highly exposed to risk. Therefore, the Bank places a higher emphasis on a continuous basis on improving risk management processes and operating with sufficient level of capital to support its risk absorption capacity and business expansions. The Bank's risk management team has to play a vital role in maintaining prudential risk management practices across the Bank which enables early detection of downside risks in all its businesses and other operations.

Based on empirical data and close analysis of market behavior, the Bank is of the belief that effective investment in robust risk management practices would facilitate in mitigates the credit, market, operational and the other risk factors facing the Bank.

Further use of market discipline is deemed to be an important driver in the enhancement of the risk management system from the Bank as well as stakeholders' perspective. Therefore, the Bank believes comprehensive disclosure of capital level in relation to the credit risk, market risk and operational risk levels would fulfill the expectations of the regulators as well as other stakeholders at large.

Scope of Basel III Framework

The Basel Committee on Bank Supervision (BCBS) has implemented a set of capital, liquidity and funding reforms known as "Basel III". The objectives of reforms are to increase the quality, consistency and transparency of capital to enhance the risk management framework of Licensed Banks.

Accordingly, the Central Bank of Sri Lanka has issued Direction No. 01 of 2016 on Capital Requirement under Basel III for Licensed Commercial Banks (LCBs) and Licensed Specialized Banks (LSBs) on 29th December 2016. As per the direction, Capital Requirements applicable for a Licensed Commercial Bank from 1st July 2017 onwards consist of three pillars.

Pillar 1	• Minimum Capital Requirements and Buffers - Credit Risk, Market Risk & Operational Risk
Pillar 2	• Maintain Adequate Capital above the Minimum Requirement (ICAAP) - Additonal Risks
Pillar 3	• Disclosure Requirements - Regular disclosure to the market covering both qualitative and quantitative disclosures on Capital , Liquidity and Risk Management

Pillar 1 - Minimum Capital Requirements and Buffers

Every licensed bank shall maintain, at all times, the minimum capital ratios prescribed below in Table 01 and shall ensure compliance with Schedule I annexed to Banking Act Directions No. 1 of 2016 on Capital Requirements under Basel III for licensed banks.

Table 01 – Capital Requirements for Licensed Banks

Components of Capital	Capital Adequacy Ratio to be Maintained
Common Equity Tier 1 including Capital Conservation Buffer	7.0 %
Total Tier I including Capital Conservation Buffer	8.5 %
Total Capital Ratio including Capital Conservation Buffer	12.5 %

Pillar 2 - Maintain Adequate Capital above the Minimum Requirement (ICAAP)

The Bank needs to maintain adequate capital buffers to safeguard itself from the exposures to risk as specified in the direction. Under Pillar 2, a Board approved ICAAP document needs to be submitted to the Central Bank for supervisory review process. ICAAP lets banks to identify, analyze and quantify its risk exposures using different methodologies, techniques and to quantify required level of capital to absorb the risks.

Further under pillar 2, banks are instructed to scrutinize different type of risks which are not covered/fully captured under Pillar 1. Accordingly, following risk categories also need to be quantified and allocation of capital needs to be done in computing the Pillar 2 Capital Ratios.

- Risks not fully captured under Pillar 1 - Concentration risk (credit risk), interest rate/rate of return risk in the Banking book (market risk) etc.
- Risk types not covered under Pillar 1 - Liquidity risk, concentration risk, reputational risk, compliance risk, strategic and business risk, residual risk. etc. (risks which are not specifically addressed under Pillar 1)

The Bank has already developed an ICAAP policy and framework which closely indicate the risk and capital assessment processes which ensures that adequate level of capital are maintained to support the Bank's current and projected demand for capital under expected and stressed conditions.

Pillar 3 - Disclosure Requirements

Commencing from 1st July 2017, the Bank needs to disclose the regulator prescribed key information in relation to regulatory capital, liquidity and risk management with the published financial statements, in the annual report and in the web site.

Pillar 3 aims to provide consistent and comprehensive disclosure framework that enhances comparability between Banks and further promotes improvements in risk practices.

The Bank has implemented a Pillar 3 policy and procedure framework to address the requirements laid down for Pillar 3 disclosure.

The complete disclosure report of information regarding capital management in accordance with Basel III- Pillar 3 is provided of which quantitative information regarding capital structure, capital adequacy and monitoring of liquidity standards is disclosed on quarterly basis. The disclosures on Bank's risk management approach and risk management related to key risk exposures are disclosed on annual basis.

Scope of Application

In compliance with the requirements under Basel III Pillar 3 and the Bank's approved policies, the Bank disclose below set of information on quarterly and annual basis as prescribed by CBSL.

Capital Structure and Capital Adequacy

The Bank's capital structure according to the Banking Act Direction No. 01 of 2016 on Capital Requirement under Basel III for Licensed Commercial Banks (LCB) and Licensed Specialized Banks (LSB) is revised in to Common Equity Tier 1 Capital, Additional Tier 1 Capital and Tier 2 Capital.

Common Equity Tier 1 (CET 1) Capital of the Bank comprises;

- Stated Capital
- Retained Earnings after appropriation
- Statutory Reserve Fund

At present Bank has no instrument eligible for Additional Tier 1 (AT1) Capital.

Tier 2 Capital Consist of,

- Eligible Subordinated Debt (limited to 50% of CET 1 Capital)
- 100% of impairment for assets in Stage 1 & 50% of impairment for assets in Stage 2 under SLFRS subject to maximum limit of 1.25% RWA in Credit Risk
- Approved Revaluation Surpluses on Freehold Land and Building (Subject to a discount of 50%)

As per the regulatory directive maximum eligible Tier 2 capital is capped at 100% of CET1 Capital.

Leverage Ratio

The Basel Committee on Banking Supervision (BCBS) introduced a leverage ratio in the 2010 under Basel III package of reforms with intention of introducing a framework with a simple, transparent, non-risk based.

The Leverage Ratio to act as a credible supplementary measure to the risk based capital requirement in order to restrict the build-up of leverage in the banking sector, helping to avoid any destabilizing deleveraging processes which can damage the broader financial system and the economy, and reinforce the risk-based requirements with a simple, non-risk based “backstop” measure.

The Central Bank has issued Direction No 12 of 2018 on “Leverage Ratio under Basel III for Licensed Commercial Banks and Licensed Specialized Banks” on 28th December 2018.

Minimum Leverage Ratio requirement for licensed banks is 3% and need to be computed as prescribed below.

$$\text{Leverage Ratio} = \frac{\text{Capital Measure}}{\text{Exposure Measure}} \times 100$$

Capital Measure is the Tier 1 Capital as specified in the Banking Act Directions No. 01 of 2016 on Capital Requirements under Basel III and both on and off balance sheet exposures including derivative exposures has to be considered under exposure measure.

Liquidity Coverage Ratio

The Liquidity Coverage Ratio (LCR) ensures Banks maintaining sufficient unencumbered High Quality Liquid Assets (HQLA) to survive a significant liquidity stress scenario over 30 days horizon. The Central Bank of Sri Lanka issued Banking Act Direction No. 01 of 2015 on “Liquidity Coverage Ratio under Basel III Liquidity Standards for Licensed Commercial Banks and Licensed Specialized Banks” on 31st March 2015.

Commencing from 1st April 2015, the Bank has to maintain LCR Ratio for all currencies and for rupee as stipulated in the direction. The minimum ratio requirement is 100%.

Liquid assets are distributed across the Bank to support regulatory and internal requirements and are consistent with the distribution of liquidity needs by currency. The composition of the high quality liquid asset portfolio has remained relatively stable over the reporting period and the previous period. The Bank maintained LCR for the Rupee & all currencies well above the minimum requirement.

Net Stable Funding Ratio

The Net Stable Funding Ratio (NSFR) is defined as the amount of available stable funding relative to the amount of required stable funding. “Available stable funding” is defined as the portion of capital and liabilities expected to be reliable over the time horizon considered by the Net Stable Funding Ratio, which extends to one year.

The Central Bank has issued Direction No 08 of 2018 on “Net Stable Funding Ratio under Basel III liquidity Standards for Licensed Commercial Banks and Licensed Specialized Banks” on 21st November 2018. The minimum ratio requirement is 100%.

Effective Date	01.07.2019
Minimum Requirement	100%

Available Stable Funding

Available Stable Funding (ASF) is defined as the portion of capital and liabilities expected to be reliable over the time horizon of one year. ASF factors such as 100%, 90%, 50% & 0% assigned according to presumed degree of stability of funding.

Required Stable Funding

Required Stable Funding (RSF) is a function of liquidity characteristics and residual maturities of various assets held and those of its off-balance sheet (OBS) exposures. RSF factors such as 0%, 5%, 10%, 15%, 50%, 65%, 85% and 100% are assigned to different asset categories accordingly.

Risk Weighted Assets

Credit Risk

Credit Risk is the potential for loss due to the failure counterparty to meet its obligation to pay the Bank in accordance with agreed terms. It is managed through a framework that set out credit policies and procedure and credit approval authority delegation. Further policies are decided to reflect the country specific risk environment and portfolio characteristics of the Bank.

The Bank computes risk weighted assets on credit exposures using the Standardized approach. In assigning risk weights for calculation of risk weighted assets using the standardized approach under Basel III, the Bank uses credit ratings from External Credit Assessment Institutions (ECAIs) who meet the qualifications specified by the CBSL. The credit ratings from External Credit Assessment institutions are applied to risk weight the claims on Banks, financial institutions and corporate customers. Claims on Retail and SME customers are risk weighted based on the criteria's specified in the directions.

Market Risk

Market risk is the potential for loss of earnings or economic value due to adverse changes in financial market rates or prices. It is managed under the market risk policies and processes to obtain the best balances of risk and return whilst meeting customer requirements.

The market risk subject to the capital charge requirements are:

- The Risk pertaining to Interest rate related instruments in the trading portfolios
- The Risk pertaining to the equities in the trading portfolios
- The Risk pertaining to the foreign exchange position.

The Bank follows the 'Standardized Measurement Method' for computing the capital charge for exposures capture under market risk.

Below table shows the RWA for market risk under Standardized Approach method:

Operational Risk

Operational risk is the potential for loss arising from the failure of people, processes or technology or the impact of external events. Operational risk exposures are managed through a set of processes that drive risk identification, assessment, control and monitoring. The senior management team under the guidance of the Board is responsible for overseeing potential risk across the Bank.

The Bank computes capital charges for operational risk based on the Basic Indicator Approach (BIA).

Capital Requirement under BIA is given below;
